

ASTRONAUTS FOR AMERICA

FALL 2026 VOTE FOR FREEDOM NATIONAL COLLEGE TOUR

WHO WE ARE

[Astronauts For America](#) (AFA) is a nonpartisan, nonprofit organization founded by over 100 former NASA astronauts dedicated to supporting and defending the U.S. Constitution, fostering civil discourse and promoting evidence-based, data-driven leadership.

THE VOTE FOR FREEDOM COLLEGE TOUR

The **VOTE FOR FREEDOM college tour** is a nationwide initiative encouraging young Americans to register, vote and become lifelong participants in our representative democracy, helping drive elected leaders toward collaboration in addressing our nation's challenges. Through interactive events, registration drives, real conversations and inspiring stories, we want to remind young people of their power to shape their communities and country. This initiative begins on college campuses—where many Americans become eligible to vote for the first time. Young Americans should make their voices heard and demand a country where the rights and freedoms embodied in the Constitution are respected and our leaders govern for the common good of the people.

Our message is strictly nonpartisan. We encourage every eligible American to vote, regardless of age, background or political beliefs. The future of this country belongs to young people, and we want to encourage them to not only learn about the candidates' positions on issues, but also hold them accountable to democratic principles and the tenets of the Constitution. We look forward to establishing long-term relationships with students across the nation to improve our political processes and better represent the people. Together, we will seek common ground across our differences to improve our political process, and build a government that is more representative, accountable and responsive to the people. Learn more about the campaign from our launch event on July 20 at the California Science Center, as featured on [ABC News](#) and [USA Today](#).

BRING AN ASTRONAUT TO YOUR CAMPUS

We are amenable to the event format most effective in meaningfully engaging students on campus, whether that's an official campus event hosted by the university, a specific department or a student group; joining a distinguished speaker series; or helping with voter registration drives.

For example, we could host an hour-long event with a professor or student moderating a 30-45 minute fireside chat or panel discussion. The discussion would cover topics such as highlights from the astronaut's career, lessons learned from space and the importance of civic participation and voting, followed by a 30-minute audience Q&A. We are eager to engage students in the program and will closely collaborate on event promotion through press and social media amplification, while working within university guidelines.

Our panel discussion at the July 20 launch event offers an example of a conversation we'd like to bring to college campuses. Check it out on [AFA's YouTube Channel](#).
